Allowance of Application # 09/960,467

1. The following communication is in response to applicant's paper received 19-September-2001.

Reasons for Allowance

2. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the information described in the related prior art, specifically the article authored by Koutamanis et al., entitled Automated Recognition of Architectural Drawings, the improvement comprising an apparatus and process for the production of engineering specifications from an architectural drawing, wherein: a digitized drawing of an architectural structure is parsed to locate the structure's determinative assets; standards applicable to at least the functional characteristics of the assets are then applied; and detailed features necessary for producing the detailed engineered drawings are generated. This patentable distinction is included in each of the independent claims, nos. 1, 6, 22, 24, 25 and 27. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <production of engineering specifications from an architectural drawing> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 11, line 2 through page 37, line 23, and Figures 1-23. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
